PROFESSIONAL EXPERIENCE

Product Manager

Beyond Limits, Dec 2019 – present

- Created roadmap for business-leading product in record time
- Influenced architectural decisions (e.g.: batch -> stream process)
- Enabled strategic customer engagements
- Quickly earned the trust of developers, data scientists, and PMs
- Key contributor on hiring to build exceptional engineering team
- Closely involved with disciplines ranging from data scientists and developers to sales and leadership management

Product Manager

Schlumberger Technology Corp, Jun 2014 – Apr 2018

- Key contributor creating vision, strategy, and roadmap for transformational cloud, data-streaming products
- Developed and delivered product message to senior leadership and customers to ensure buy-in of key strategic software products
- Conducted competitive analyses to gather data and generate insights in support of the vision, strategy, roadmap, and pricing
- Led a user community to gather information to align business priorities with customer needs and design an intuitive experience
- Developed a solution enabling a multimillion-dollar contract win

Software Lead Developer

Schlumberger Technology Corp, Sep 2012 – May 2014

- Led a team developing an in-house product from conception to launch that supported a \$10M real-time monitoring business
- Introduced business-driven requirements and design process that led to a 17% increase in customer efficiency in key workflows
- Developed admin and developer features and a deployment guide for our on-prem O&G production data management framework
- Provided software architecture insights to senior leadership that led to business decisions such as a team international relocation

Software Engineer | Project Manager

Schlumberger Technology Corp, Jan 2007 – Aug 2012

- Managed four successful in-house product launches instrumental for a \$1.5B engineering business
- Key liaison between business and engineering. Provided worldwide support for 900 users and managed biz requirements
- Pioneered Agile software development in the company shortening project development cycles and adapting based on feedback
- Led lean methodology introduction in a center of 300 employees implementing initiatives that delivered savings of more than \$80K annually by increasing efficiency
- Created a DevOps culture in a group of 20 developers, this resulted in savings of \$150K per year
